NEW ZEALAND GUARDS SERVICES

Guard New Zealand is the management and dispatch option for customer and partner Guard companies. To speed up guard response times *Guard New Zealand* can organise multiple guard organisations to simultaneously respond to customer alarm activations. Alternatively the customer could contract directly with the Guard company and manage this service themselves.

SECURE LINK COMMUNICATIONS

The *Security Link* alarm transport system is IP based and is designed to be continuously operating and able to pass Security Alarm messages instantly. With IP based systems, line interruption can also be detected immediately, ensuring the communications path is functioning 24/7.

INSTANT MESSAGING SYSTEM

Alarm New Zealand provides Alarm service agents and customers with an automatic message forwarding system either by *sms*, *email* or *paging*. Additional information can be obtained realtime via the free *AlarmNZ* web portal.

UNIVERSAL NETWORK ACCESS DEVICE

Full connectivity for legacy alarm equipment, new private security alarms and IP based systems is provided for by *AlarmNZ's* network access device (NAD) and central alarm data switching system.

In accordance with the NZ Security Association (NZSA) standards, **ALARMNZ** is a fully accredited Grade B2 Alarm Monitoring Centre. The various security link services offered by the company such as *Challenge*, *Lockdown* and *Critical 24/7* all meet all the statutory and regulatory requirements for such activities and conform to the standard required by insurers.

ALARMNZ has a reputation for quality data management and service excellence that is recognised by the majority of independent alarm service companies throughout New Zealand as the best in the business.
